[Unit 2 - Assignment 2: Links & Attributes]
[Due: 05.28.14 - By 8:00pm]

Instructor: Josh Engen
E-mail: jengen@ipr.edu

Description:
Create a functioning website that includes four completed pages. Create a menu that connects the pages via hyperlink (use the file structure discussed in class).

1. The title of each page should be “first name, last name - question number”. (example: Josh Engen - Question 3. Make sure that the title of each page refers to the correct question).

2. At the top of the page, create a small menu using an unordered list. These links should be titled “Question 1,” “Question 2,” “Question 3,” and “Question 4” (based on the content of each page). Each link should be on its own line and directed to the appropriate HTML document (based on the naming scheme in the next point).

3. Pages should be saved as: q1.html, q2.html, q3.html, and q4.html

4. Include one image per page, and store all of the images in a folder called “images” in your root directory.

5. Every page should use the XHTML 1.0 doctype.

6. Use the following page-specific instructions:
   • Page 1/Question 1:
     Answer the following question: In your own words, give a brief history of HTML (Including its founder, and a few important dates) (150+ words).
     Format the heading using the <h1> tag (as illustrated in the attached example).
     Include an appropriate image.
   • Page 2/Question 2
     Answer the following question: In your own words, describe the importance of standardization for HTML (and other internet languages) (150+ words).
     Format the heading the same way as you did for the previous question, except use the <h2> tag.
     Create a list. Each item on the list should be a link to an appropriate website.
   • Page 3/Question 3
     Read Dawn Hogue’s essay on hypertext writing (http://www.mshogue.com/ce9/hypertext/htx_essay.htm) and answer the following question: What are some of the differences between hypertext writing and linear writing? (150+ words).
     Format the heading the same way as above, only using the <h6> tag.
     Make sure that you create a link to Hogue’s essay.
   • Page 4/Question 4
     Format the heading using the <h1> tag.
     Question: what is a self-closing tag? What are some examples?
     Create a link to your source.
Example:

```
Question 7: Who let the dogs out?

"Who Let the Dogs Out?" is a song written and originally recorded by Anslem Douglas for Trinidad and Tobago's Carnival season of 1998. It was heard and taped on a float by hairdresser Keith from the London salon Smile, who played it to Jonathan King, who recorded it and released it under the name Fatt Jakk and his Pack of Pets. It then came to the attention of King's friend Steve Greenberg, who produced it with a group he was promoting called The Baha Men.

The Baha Men covered the song and placed it in the movie Rugrats in Paris: The Movie and on its soundtrack album and then released it as a single in 2000, when it became the band's first hit in the US and the UK. It reached #40 on the Billboard Hot 100 in the United States and #2 on the UK Singles Chart. It was the 4th biggest-selling single of 2000 in the UK, and went on to become the highest-selling single of the 2000s not to reach #1. It was also a big hit in Australia, where it reached #1. The track went on to win the Grammy for Best Dance Recording on the 2001 Grammy Awards.
```
